MEMORANDUM TO ALL CARP MEMBERS

Recently, a member of this Association, also a member of CARP, engaged with Anthony Quinn, CARPs Community and Benefits Officer in a lengthy telephone conversation as to why CARP does not advocate for Canadian seniors with respect to Life Settlement options.

The ability to access fair market value of a life insurance policy, now rather than waiting for death or termination of benefits because of inability to continue funding premium.

We are advised that Mr. Quinn, under some intense questioning was only able to cite CARPs reasons with answers provided by the life insurance industry.

Answers categorically incorrect and so substantiated in many surveys and reports, most of which appear on our website, www.lisac.ca.

Our question to Mr. Quinn is simple! **Why does he not do his own due diligence? Investigate the real facts and then advocate for you, the members.**

Otherwise, why do you pay for membership?
